REMARKS

New claim 11 recites, among other things, that a single pair of LEDs 32, 34 is mounted on the front wall of the housing and flank the window 18. These LEDs are mounted in sleeves projecting past the window.

U.S. Patent No. 5,572,006 to Wang discloses no single pair of LEDs, no LEDs mounted on a front wall of a housing, and no sleeves projecting past a window.

The same is true for newly cited U.S. Patent No. 5,581,071 to Chen. The external light source 20 is not mounted on the front wall of the housing on which the window is mounted. The light source 20 is not a single pair of LEDs. The light source 20 does not flank the window. Nor are there any sleeves perpendicularly projecting past the window.

The same is true for U.S. Patent No. 6,347,163 to Roustaei. There are no external LEDs, and no sleeves extending past the window.

Reconsideration of the outstanding rejections in view of the new claims is respectfully requested.

Wherefore, a favorable action is earnestly solicited.

Respectfully submitted,

KIRSCHSTEIN, OTTINGER, ISRAEL & SCHIFFMILLER, P.C.
